*THE OHIO ALUMNUS* is published monthly in October, November, December, January, March, April, May & June by The Ohio University Alumni Association. The annual subscription rate of \$4.00 includes membership in The Ohio University Alumni Association. Remittance should be made by check or money order payable to The Ohio University Alumni Association, P.O. Box 285, Athens. Entered as second class matter, October 3, 1923, at the post office at Athens, Ohio, under the Act of March 3, 1879. Printed at The Lawhead Press, Inc., Athens, Ohio.

DR. GEORGE E. HILL, professor of education and head of Ohio University's guidance training program, operates inter-communication instruments in control room of the Guidance and Reading Laboratory, while graduate student conducts an interview. Between them is a one-way glass partition.

# Big Boom in Guidance

After struggling along unnoticed for 60 years, the guidance movement in education has suddenly become a lively issue

**I**N SPITE of spiralling college enrollments, the United States today is wasting its intellectual resources at the rate of about 200,000 18-year-olds a year.

Many educators believe even this figure is too low. What it refers to is the number of really talented young men and women who terminate their educations with high school each year. What it does not include is the vast number who do not even complete high school, and many more who become channeled into collegiate patterns for which they have neither aptitude nor interest.

The situation is not new. Statistics compiled in nearly every state in the union have indicated for many years that only about half of the top 5 percent of our high school graduates even enter college. But it is only in recent years that the matter has become one of public concern.

The result is a sudden boom in an educational phase that has been struggling along almost unnoticed for six decades—guidance.

### **Sharp Attack - Stubborn Defense**

As with any philosophy or method that emerges suddenly in the public spotlight, guidance finds itself the object of sharp attack and stubborn defense. There are few topics on which a greater divergence of opinion can be found.

The range of opinions creates utter confusion to the casual observer: Guidance destroys initiative. It helps a student discover his real desires. It makes him dependent on others for his decisions. It enables him to prepare himself for the future. It dictates his future.

These opinions and many more are thrown into the arena to be stalked, attacked, sometimes devoured. But many ideas survive, and it is from these that a nation-wide trend in guidance moves on.

The survival is sufficient that more than 25,000 counselors are on the job in public schools throughout the U.S. today, forty-one states now have some form of counselor certification, 212 universities offer graduate degrees in guidance, and the federal government is offering financial support of guidance training.

### **Doubt About Best Methods**

Guidance programs today are far from perfect. Top men in the field readily admit that they are still very much in doubt as to the exact procedures to utilize in making guidance work best. In many instances guidance still is failing to live up to expectations.

But there is also an abundance of research evidence indicating steady progress in helping students better learn to solve their own problems and make more realistic vocational choices.

There are many kinds of guidance programs—those for the aged, Veterans Administration services, industrial guidance, and many others. But the big emphasis is in the past few years has come in the high schools and colleges.

This can be traced principally to the concern over loss of talented students and subsequent adoption (in 1958) of

the National Defense Education Act turning over several million dollars to states for improvement of guidance programs in secondary school.

Strangely, however, increased guidance was not the principal reason behind adoption of the Act. Primarily, legislators were concerned with scholarships for deserving students. But when they got the program started they realized that it didn't matter how much was spent if the talented children weren't identified and properly motivated. As a result, guidance emerged as the most important part of the overall scheme.

### **Training Programs Increasing**

Today many educational institutions, Ohio University among them, are rapidly expanding their training programs for guidance specialists. Through research, trial and error, conferences and testing, they are developing basic goals and effective methods of reaching these goals.

Before World War II, a great deal of money was being spent to help children who were at the bottom of the intelligence level. After the war the emphasis shifted to the upper level children. But in both instances the much larger group of "normal" students was overlooked.

Today's philosophy of guidance recognizes a responsibility to assist all students in making plans for their futures. The philosophy is expressed aptly by a chapter heading in a book by Dr. George E. Hill, professor of education at Ohio University. It reads, "All God's Children are Gifted."

The modern guidance program is designed to give systematic aid to all pupils in recognizing and solving problems they must meet—educational, vocational, personal, social, moral, health and civic.

### **Major Aspects of Guidance**

Although it is oversimplifying the program somewhat, guidance can be broken down into six major aspects. They are:

1. Pupil Record Services. This includes a system of cumulative records containing information about family background, scholastic record, health record, vocational plans, hobbies, and other detailed data.
2. Informational Services. Written material on occupations, educational opportunities and personal adjustment are carefully organized by guidance experts.
3. Counseling Services. Provisions are made, when possible, for counseling of all pupils to open the way for intelligent self-decision and self-direction by the student.
4. Group Guidance Services. Organized group activities supplement the private counseling sessions.
5. Placement and Adjustment Services. This service includes placement in any appropriate situation—a classroom, a school activity, with an agency for special service, post high school training, or vocational placement.

*(Continued on Next Page)*

6. Research. Studies are necessary in determining the results and future development of guidance programs.

In all instances, guidance instructors emphasize the fact that they are interested in training persons to help students mature and make their own decisions.

Dr. Hill, one of the leading men in the field, explains that "a good counselor works himself out of a job with a student. He doesn't want to develop a sense of dependency upon himself. Rather, he wants to help students learn how to make their own decisions. This is something a lot of people don't understand about guidance."

Another common misconception is that guidance serves merely as a means of setting a course for the future. Actually, the program is set to continue well beyond that point.

An example is in the case of an unusually gifted student. When he is identified and is able to decide what he wants to do in college, he will probably be able to get a great deal of assistance through scholarship programs.

### By-Product of Scholarships

This leads to a further need, for individual counseling, to help him maintain a realistic understanding of values. Being heavily subsidized, he might otherwise develop an attitude that the world should continue to take good care of him.

These problems are of as much concern to educators training guidance counselors as are the problems of placement.

But the most important force, as well as the greatest problem in the entire guidance picture is not in the school. It is in the home.

A child's most important counselors are his parents. And, unfortunately, there are many children who get very little encouragement at home, or get educational advice from parents who are not well informed.

### A Problem With Parents

One of the most difficult situations is with the student who does not want to be a doctor or lawyer, has no aptitude for training as a doctor or lawyer, but whose parents tell him he is going to be a doctor or lawyer—or else . . .

Guidance people do not feel that they should, or could attempt to build a program in terms of making up for what children have missed at home. Therefore, they are stressing more and more the importance of conferences with parents, as well as students.

Where the program will lead is uncertain. Major and minor adjustments continue to change the picture as guidance gains in scope and in stature. Millions of dollars are being spent, through state departments of education and through universities such as OU, for testing students and training more guidance workers.

In short, guidance has progressed from a relatively unimportant means of offering vocational advice to an integral part of our educational system.

GUIDANCE at the University level is supplemented by a Testing and Vocational Counseling service, operated by members of the Psychology faculty. Results of tests, such as the one being given in the photo by Dr. Maxwell S. Pullen, are given to the student's adviser. The tests help determine abilities, interests, aptitudes and achievements of students who request the counseling service.

by Dr. Sumner Price

## Close-Up on ★ 49

A resident of America's 50th state takes an interesting look at the country's 49th state.

BEING ACCUSTOMED to the balmy breezes we have in Honolulu, Hawaii, I looked forward to my summer trip to Alaska with some apprehension. However, from my first contact with Alaska and its people I soon learned that this new state has a lot of warmth about it.

After a six hour trip from Seattle to Anchorage aboard a DC-6, we found a city which claims nearly 100,000 inhabitants situated on a plain surrounded by mountains and extensive mud flats. The city is much like any other western town of one third the size; small, unattractive buildings, some of two stories, and the Western Hotels have a big hole dug for their new 12 story edifice.

The city has grown so rapidly it shows the effects of this expansion but I'm sure the next few years will provide an even greater change as modernization occurs and capital flows in. Undoubtedly the city has passed through its youthful diaper phases and will shortly spruce up as real estate values go skyrocketing.

A number of the shops appear "spruced-up" already and are attractively decorated. They carry a fairly good line of materials at prices which are from 15 to 25¢ higher than Hawaii and the West Coast.

Several good restaurants were found and the people of Alaska like good food just the same as the rest of us. They may have blubber in the North for the Eskimos, but they feed on beef, potatoes, and sea food in the cities.

Occasion for the trip was to go to Seward, some 125 miles south of Anchorage, to conduct a Hospital Institute under the sponsorship of the Western States Hospital Association. There are about 22 registered hospitals in Alaska. Eight of these are governmental and are presently used for the "natives" only or for tuberculosis.

Ten of the 22 hospitals are under the sponsorship of the Catholic Sisters of which there are several orders. This leaves one Presbyterian hospital and not more than three

*(Continued on Next Page)*

community sponsored hospitals. When one thinks of the first hospital having been founded in 1886 by the Catholic Sisters, and nine others since—it shows the debt of Alaska to these sisters of mercy for otherwise there wouldn't be much hospital service in Alaska.

The hospitals are faced with smallness and low census which makes it difficult to organize and staff properly. One hospital is looking for a nurse anesthetist who can also act as administrator and purchasing agent. It is necessary to double up on jobs.

Then there is the matter of transportation—especially in winter. There is a good road from Anchorage to Seward of some 125 miles and another to Palmer, and another to Fairbanks, but there probably aren't over 1,000 miles of hard surfaced road in the state outside of the Alaska Highway (Alcan).

They have some 545 miles of railroad running from Seward to Fairbanks—a road with good equipment but hauling supplies North and returning empty, for the most part. Seward, a village of 3,200, has a hundred or more boats of variable size in its yacht harbor and about 40 private airplanes—most of which have pontoons. Travel in Alaska is principally by bush-pilot methods.

### Essentials for Comfort

The New Seward Hotel doesn't look like much except a two story white asbestos shingled rectangular building. It is run by a retired Major, but Duncan Hines recently gave the seal of approval and rightly so. The beds are good, the rooms clean, attractively decorated and furnished, providing all the essentials for a comfortable stay.

Seward is on Resurrection Bay, a landlocked harbor, iceless the year round, probably 16 to 20 miles long and from 3 to 5 miles wide. The snow-capped mountains precipitously drop into the bay with very little shore land available except for small scattered stretches. There is little soil in the rocky pinnacles, so the timber line appears relatively low—just the bare snowcapped rocky pinnacles and here and there a pocket of ice from a glacier.

The temperature was around 60 which was comfortable,

Landscape of America's 49th state varies from the beautiful coastal mountain terrain to the swampy, rolling Tundra of the interior.

but as we came close to shore to look at an occasional glacier, the air became chilly.

The Magnitude of the glaciers near Seward is tremendous. Anyone of seven or more glaciers is larger than all those in Europe put together and probably accounts for the description of "Sewards deep freeze" for this area of Alaska. They are beautiful, and they have a clear translucent gray blue color a shade less intense than the Newport cigaret package.

We took a small fishing boat to the outlet of Resurrection Bay as it enters on the Gulf of Alaska. On the way out,

A 1921 graduate of Ohio University, Dr. Sumner Price is administrator and medical director of The Queen's Hospital in Honolulu and a loyal transplanted citizen of the 50th state. He has received many commendations for his work in medicine and was presented with a Certificate of Merit by the OU Alumni Association in 1958.

there were several porpoises and whales cavorting around—diving and blowing—so we finally came near a precipitous rocky island where we were told there might be fish.

In an amateurish way I threw my baitless hook over the side of the boat and was pulling out a small amount of line to get the feel of the tension of the reel, when zingo, my reel was spinning and a fish was running away with my hook.

We caught 33 black sea bass in an hour and a half with no bait other than hooks.

In spite of the apparent smallness of Seward, its general drab appearance has a most modernistic appearing armory, a new high school, and several good restaurants.

I am sure all of Alaska couldn't be as well equipped for comfort as Seward, but my impression of this small city of 3,200 was that they live well and have the essential comforts and quite a few luxuries. Even the Flamingo bar is quite attractive, although some twenty other bars may not be.

### No Race for Weak Hearts

On Labor Day they hold an extermination marathon. The "extermination" is my addition to the title because it would seem to me a way to get rid of all potential cardiacs with one stroke. It is staged on a steep "Marathon" mountain immediately back of the town, perhaps only some 4,000 feet high.

The object is run up and down the mountain in the shortest time—perhaps 53 minutes or so. Getting down would be no trouble if they only had padding gear at the top which one could put on to avoid fracturing so many bones on the rubble slides on the way. The prize is about \$1,200 and a free trip to the doctor's office.

It seems everyone is trying to get in and out of Alaska—the planes are full both ways. I was quite touched by one teen-aged youngster whom I overheard talking to a companion on the streets of Anchorage, "What I need is five bucks to get a square meal. Gee, but I hope I can

*(Continued on Page 16)*

# Investment and Growth

By Dr. Thomas S. Smith

ASSOCIATE PROFESSOR OF PHYSICS  
CHAIRMAN OF THE OU RESEARCH COMMITTEE

ON SEPTEMBER 12, 1959, a Russian projectile landed on the moon. Two days later the Premier of Russia arrived in the United States bringing with him the satisfaction of once more having had his country demonstrate its ability to surpass the free world in a tremendously complicated technical race. International competition is increasingly becoming a competition between research institutions. Traditionally in the United States, basic research, the precursor of all technical development has resided almost exclusively in the laboratories and libraries of the universities.

In addition to the national need for basic research there are two reasons why Ohio University must continue to expand its research program: to stimulate continued academic growth, and as an investment.

There are three ways by which research contributes to the academic growth of the University. First, the prestige of Ohio University in the academic world depends to a great extent upon the results of scholarly research performed at Ohio University by Ohio University faculty members. Also, the installation of the doctorate program in several of the departments and plans for further expansion in this direction demand a rapid increase in the amount of original research. Second, Ohio University needs a productive research program in order to attract young, competent instructors. The major problem facing all universities in the immediate future is the one of procuring teaching staffs. In

order to compete in this dwindling market it is necessary not only to permit these people to distribute knowledge to their students but they must also be given the opportunity to produce knowledge through research.

Third, a reputation for significant research is necessary to attract graduate students. In general, a graduate student will select a field of interest and then enroll in the university where an active program headed by outstanding men is being carried on in that field.

The second need for adequate research funds is as an investment. The relatively modest amounts provided by the university frequently act as "pump-primers". Many private industries and governmental agencies are interested in supporting research in universities, but many of these granters are also reluctant to give funds to an institution unless it already has a productive research program in operation. Evidence of tangible support by the university is a prerequisite to receiving outside aid in many cases.

## Increase in Activity

Ohio University, with assistance from The Ohio University Fund, Inc. and from special funds provided by the President and Board of Trustees, has substantially increased its activity in basic research during the past few years. Since January, 1958, the O.U. Fund along with other university funds have initiated 51 research projects. During the same period 26 projects have been operating on outside grants.

The multiplication of O.U. Fund research dollars can be illustrated with some examples. Professor Robert K. Ingham of the chemistry department has been investigating the synthesis of organophosphorous acids and studying their effects as controllers of plant growth. The importance of Dr. Ingham's work has been recognized by the U. S. Army, Department of Biological Warfare and the Research Corporation of New York such that these two agencies have aided his project with more than four times the dollars supplied by Ohio University.

## Help from Outside Agencies

Professor Charles A. Randall of the Physics department has been doing research in the study of cosmic rays. The O.U. Fund and the university have provided him with \$1200.00 while the National Science Foundation has granted him \$17,500.00 to be used on the same project.

Many of the other research projects which have received support from the O.U. Fund have obtained similar assistance from outside agencies. The obvious method by which alumni can promote research at Ohio University is to contribute to the O.U. Fund.

It is not unusual for such a contribution to result in a grant ten times as large from another source. Total income for Ohio University's research programs should reach the order of a million dollars per year in the next few years. This can only be accomplished through sufficient support from alumni.

# The Only Difference Is Location

With this issue, the *Alumnus Magazine* begins a regular section devoted to activities in Ohio University's six branch colleges. With more than 2600 students enrolled, many of them full-time, the branches represent an important segment of the university.

SINCE THEIR inception in 1945, Ohio University branches have been growing not only in enrollment but in relative academic importance to the overall University program.

This semester, as the branches begin their 14th year under the direction of Dean Albert C. Gubitz, a significant step has been made. For the first time, many prospective students who plan to enroll at the main campus are being asked to consider beginning their college careers in a branch.

This innovation reflects the present

importance of the branch program. It is possible because the branch colleges are not separate satellites of the university they represent.

The branches have always formed an integral part of Ohio University. The only real difference between a student on the campus and a student in the branch is location.

An Ohio University student attending classes in Lancaster, Zanesville, Portsmouth, Martins Ferry, Chillicothe or Ironton receives on-campus credit just as if he were in Athens. The same

is true for two "sub branches" at Lockbourne Air Force Base in Columbus and at the Atomic Energy Plant near Waverly.

The students can complete two years of work in commerce, arts and sciences and education, and one year in engineering and fine arts at a branch. After one semester he has priority to transfer to the main campus if he desires.

Branch students attend Ohio University football games without charge. They are invited to take part in other social events on the campus. They are eligible for scholarships and for membership in honor societies.

In short, there is no division between branch student and campus student.

## ENROLLMENT BY CREDIT HOURS

BRANCHES	9 - 11 Hours	12 or more Hours	More Than 9 Hours	Total Enrollment
Chillicothe	63	95	158	504
Ironton	11	49	60	168
Lancaster	33	105	138	447
Martins Ferry	44	134	178	288
Portsmouth	54	188	242	544
Zanesville	31	74	105	433
Goodyear				100
Lockbourne				150
Total	236	645	881	2,634

### Outlook for the Future

The future of the branch colleges becomes almost obvious in light of enrollment trends. More and more students will be starting in the branches. It is not inconceivable that a day-time operation will emerge in one branch city, in addition to the present afternoon and evening programs being conducted now.

Further testimonial is evident from the national acclaim which has come

DEAN ALBERT C. GUBITZ

to the branch program. This fall Dean Gubitz has been asked to visit universities in Maine and Minnesota to serve as a consultant in setting up similar operations.

#### Branch Administration

The principal factor making Ohio University's branch program different from those tried in other states is its organization through a dean.

In other states each branch operates as a separate unit, handling its own admissions, registration and academic processing. In the OU branches these functions are carried out on the main campus. Admission is made at the campus and records are kept in the office of the registrar. Everything funnels through the office of Dean Gubitz, and directors at each of the branches report to the dean.

When an academic problem occurs, it is handled by the proper academic dean on the OU campus, again through the office of the Dean of the Branches.

An obvious advantage of this system is in its economy. The entire branch operation is self supporting.

As to quality, Dean Gubitz has only to point to past records of achievement.

The academic record of on-campus students who started in the branches is well above the university-wide average. Branch students also have earned far more than their statistical share of memberships in Phi Beta Kappa.

Among Ohio University alumni who started in the branches are engineers, doctors, dentists, lawyers, businessmen and teachers. Some have gone on to receive doctorates.

Many of these persons believe they

never would have had the opportunity to begin college had it not been for the branch program. Most of them held part-time jobs during their semesters in the branches, saving enough to get started on the main campus.

This semester there are 2634 Ohio University students in the six branch colleges. They have the same standards, the same courses, the same instruction and the same future as they would have if they were on campus.

ADVISORY COMMITTEE for the Lancaster Branch College met with Dean Gubitz on the campus last month. Left to right are Gordon W. Herrold (choirman), Mrs. Horvey Weis, Mayor Horvey Weis, Dwight Heister, Mrs. Dwight Heister, Howard Kirk, Mrs. Howard Kirk, Mrs. Paul Cummins, Paul Cummins, Mrs. Albert C. Gubitz, Mrs. Dorwin Kindler, Darwin Kindler, Mrs. Irvine Smith, Mrs. Nelson Embrey, Mrs. Gordon Herrold, Mrs. Robert Fox, Dr. Robert Fox, Dean Albert C. Gubitz.

# Bobcat Roundup

By Rowland Congdon, '49

**D**ESPITE A disappointing 24-0 loss to Miami's Redskins, the Bobcats still remained in contention for the conference title. Miami plays one less game than either OU or Bowling Green giving the latter two the best chance of emerging on top. BG had its chance to down Miami or suffer its first league loss when the two teams met the week after the OU-Miami game.

Anyway, the final game of the season between OU and Bowling Green can well be for a share of the title or a clear-cut championship for either of the two.

OU made too many mistakes against Miami, fumbling four times, losing all four; having two passes intercepted and a blocked kick. Miami had none of these mistakes and used four of OU's to begin touchdown drives.

**T**ENSION is high in Athens as this is being written. By the time you read it the tension may have subsided or be rising to a new peak.

For everyone's talking about the Bobcat football team of 1959.

A year earlier than even the most hopeful follower would admit, the OU football team has overcome one of three major hurdles needed to tuck away the Mid-American Conference championship.

The first obstacle was Kent State. The second approaches two days after this is being written—Miami, and the third looms up on the final date of the season, at home against Bowling Green.

Not given a chance to finish better than fourth in the league by many deposters, the Bobcats find themselves in the enviable position of being perhaps the most feared of all the conference teams.

They have already subdued one of their chief adversaries, Kent State's Golden Flashes, picked as contenders along with Miami and Bowling Green for the crown in 1959. And OU did not just beat the Flashes. They annihilated them. 46-0. The next week Kent downed Miami, 14-6, the first conference team to defeat the Redskins in 29 contests, since 1952.

The excitement began to mount after OU's convincing

36-7 win over Toledo in the season opener. Subsequent events have proved otherwise, but Toledo was believed by some observers to be one of the darkhorse contenders for the crown this season. They have yet to win a conference game in three tries.

Skeptical Bobcat followers were not sure. They wanted to be shown. At the home opener a week later they were. After stopping Kent on their own one-yard line early in the game, the Bobcats completely dominated play.

This convinced one and all that OU's young team had come of age, a year earlier than expected.

Another week and the Bobcats had their third victory. This victim was Xavier, who displayed a pro-type offense, throwing the ball all over the place and sending backs scurrying in the most unbelievable directions.

The Bobcats solved the puzzle, however, and won, 25-7. But it was not without its toll. Joining tackle Mike Kielkovicz on the sidelines—he had suffered an injured knee against Kent—were three other top-ranking Bobcats.

First string quarterback Otis Wagner broke his left hand. Tackle Paul Erdy injured his knee as did End Dick Henry. It was originally feared the quartet would be lost for sometime. Henry is. He is out for the season. The Springfield junior was running with the second unit.

After laying out of the Youngstown game, the remaining trio worked out the week before the Miami game and were found to be ready to go. Wagner, however was not at top strength, playing with his hand in a special cast. Without them, OU had no trouble subduing Youngstown in a Friday night game in the northern Ohio city. OU won, 44-12.

Moved into Otis Wagner's number one quarterback slot for this game was junior Dave Wagner—no relation—who proceeded to pass for two touchdowns and score two others in his first starting assignment. The performance earned for him the coaches' Bobcat of the Week award, a WOUB promotion honoring the top team performer each week. The coaches' own Lineman of the Week award for Youngstown went to Center Dick Greeni for the second time. He also won it for the Kent game.

Bobcat against Toledo was Guard Joe Dean, who also was the lineman of the week. Halfback John Balough won Bobcat honors against Kent and Bob Brooks was the "top dog" in the Xavier game when Tackle Joe Trevis was considered outstanding lineman.

Prior to the Miami game Brooks was being considered by one national wire service as a nominee for All-American

fullback along with Ohio State's Bob White and others.

A Cincinnati sports writer, after seeing him churn for 189 yards against Xavier, including an 86-yard touchdown run from scrimmage, called him "as good as any fullback running on any gridiron in the Midwest."

The 190-pound Winchester, Ky., junior was OU's leading scorer and ground-gainer in 1958 as a sophomore and was voted by his teammates as most valuable player. Through four games of 1959, Brooks was averaging 7.8 yards in 51 carries, gaining 397 yards, more than half of his 1958 total. He had also scored 30 points, including four touchdowns, both figures better than half of last year's total for the season.

Brooks is aided considerably this season by an improved backfield consisting of Hallbacks Bob Harrison and John Dickason, both juniors, and sophomore quarterback Wagner.

Harrison, who is running with new authority this year, is only 36 yards shy of his total yards gained for 1958, through four games of 1959. He is second to Brooks. Dickason is fourth in rushing, he was second in 1958.

But ahead of Dickason, in third spot, is probably one of the most improved members of the squad. Gaining speed by following speedster Les Camey in track last spring, John Balough is the fastest runner currently on the 1959 varsity team. He has an 84-yard kickoff return for a touchdown against Xavier to show for his efforts, too. Balough is also a junior.

In fact, the only senior in the backfield is second unit quarterback Bob Wisniewski from Lima. Senior linemen are Paul Erdy from Lorain and Joe Trevis from Lowellville, both tackles. These three were elected tri-captains of the squad. One other senior is an inactive player, but does some placekicking. He is Henry Scott from Cincinnati, laid up with a shoulder injury.

### Freshman Football Team Wins First Game

While everyone was talking about the Bobcat varsity, other sports teams were vieing for their share of attention. The freshman football team began in an auspicious fashion, defeating Miami's freshmen, 24-0, the third straight year OU's freshmen have handled Miami's yearlings.

It also marked the fourth time in the last five years, OU has beaten Miami. Before long, this tide should engulf the varsity teams of the two schools, we hope.

### Varsity Soccer Paces Ohio League

OU's soccer team, in its fourth season as a varsity sport, was enjoying its best year under Coach John McComb. A 3-2 record included a 6-0 win over Ohio State, and wins over Dayton and Denison, two of last year's state powers.

The cross country team was not having as much luck as the three aforementioned teams. Their record was 1-6 under the coaching of graduate assistant Burch Oglesby, a win over Marshall the only chance so far of not being shut-out in the victory column. However, an undefeated freshman team, paced by last year's high school state champion, Ray Fleming from Akron, gave hope for the future in this sport and also in track.

TOUCHDOWN brings partisan crowd to its feet, "Stand Up And Cheer" from the OU Band, in game with Kent State University.

VICTORY stampede is led by Head Coach Bill Hess, crossing field to shake hand of Trevor Rees after 46-0 Bobcat win.

BANDSMEN from 25 high schools joined the OU Marching Band at halftime program of the Xavier game. Some 1475 students took part in the "Band Day" event.

JOHN F. KENNEDY

### Senator Speaks at Center

STUDENTS AND townspeople had the opportunity to hear Presidential Hopeful Candidate John F. Kennedy when he was in Athens September 18.

The Massachusetts senator spoke at a \$5-a-plate Ohio Democrats dinner in the Center Ballroom and then stepped out on the steps of the Center to give about a 15 minute talk to the gathered students and townspeople.

Rather than a campaign speech, Senator Kennedy spoke to the college students about the Greek philosophers, education and the responsibility to government. He reminded the students of their obligation to society and said they should return to society those qualifications which society had helped to develop in them.

### "Mark Twain Tonight"

STUDENTS, faculty and townspeople filled every seat in Memorial Auditorium to see Actor Hal Holbrook give his famous impersonation of "Mark Twain," Oct. 26.

Cleveland-born Holbrook opened the Mark Twain show in New York City and is now touring the country. Next year he plans to take the show around the world.

The authentic performance can be traced to a thorough study of Twain's background and mannerisms, plus a three-hour make-up job, plus an innate ability to act.

### Ohio U's Evening School

AN INNOVATION on campus this semester is Evening School.

Seventy people are taking courses in Bible as literature, accounting, elementary sculpture, western civilization in modern times, marketing and social sciences which are offered for college credit.

Evening School offers an opportunity for adults to continue their studies or to explore some area of interest. Classes run from 7 to 9:30 p.m. on Tuesday evenings.

The program is on an experimental basis, according to Dr. McKelvey who is director of the Extension School. If the program proves successful this semester, it will probably be offered again.

### President's Assistant

A MEMBER of faculty and administration since 1948, Dr. Frederick H. McKelvey was recently named assistant to President Baker. This appointment creates a new position at the University's top administrative level.

Dr. McKelvey heads an area including the admissions office, library, registrar's office, veterans' affairs, ROTC, foreign students advisorship in addition to summer school, extension and workshops, which Dr. McKelvey has been in charge of in the past.

He now joins Brandon T. Grover, Treasurer Paul R. O'Brien and Business Manager Luverne F. Lausche at the administrative level just below President Baker.

During the academic year from 1956 to 1958, Dr. McKelvey served as director of urban education for the Ministry of Education in Guatemala, Central America.

on the green

### Ohio University Review

IN THE SPRING of last year a new publication was introduced on the OU campus. "The Ohio University Review" is an Ohio U. publication of contributions in the humanities. This is the first time OU has ever had such a publication. In the first "Review" there are five contributions; by Dag Hammarskjold, Paul M. Kendall, John F. Cady, Willard H. Elsbree and Troy Organ.

Associate Professor of English Eric Thompson is chairman of the Board of Editors, which is the group that does the contacting, selecting, editing and all the minute details connected with a publication. Assistant Professor of English Taylor Culbert is the managing editor.

Other members of the board are Dr. Morton Benson, assistant professor of

German and Russian; Stanley Grean, assistant professor of philosophy; Dr. Charles Mayes, assistant professor of history; Dr. Paul R. Murphy, professor of classical languages; Dr. William Olpp, assistant professor of fine arts; Dr. Edward Stone, associate professor of English and Dr. Edgar W. Whan, associate professor of English.

The Board of Editors stipulates that the contributions be of a serious and scholarly nature dealing with the humanities. As Professor Culbert pointed out, almost any subject can qualify as long as it has emphasis on the human aspect.

The six by nine inch booklet has a cover designed by Charles L. Smith, associate professor of design. The articles average about 13 pages and at the end of the booklet there is a biographical sketch on each contributor.

This project was approved by the Board of Trustees the beginning of last year and money was allocated. President John C. Baker appointed the Board of Editors and work was begun on the publication.

Volume I, No. 1, which came off the presses at the close of the school year, has nearly reached the four corners of the world. The booklet was sent to all Honor Members in the Alumni Association—and many of these are living abroad. In addition to distribution to faculty and administration, Chubb Library received about 400 copies, which they sent to libraries throughout

this country and abroad. Managing Editor Culbert said there have been several letters from people in foreign countries commenting on the publication. Librarian Walter Wright has also reported receiving publications from other universities as a result of OU's sending out the "Ohio University Review."

The second edition of the Ohio University Review is expected in the spring of 1960.

### **Men Take Over Boyd Hall**

**BOYD HALL**, a coed dormitory since its construction in 1907, is a boys dorm this year. The change was made to provide more dorm space for girls. Approximately 100 residents are in Boyd and Shively Hall, previously men's housing, has 250 girls.

### **Enrollment Figures**

**THE ALL-TIME** high for Ohio University in enrollment figures came out this fall as 7717. Last year's enrollment was 7347 on campus and 2354 in the branches. This year the branch enrollment is 2634. Men outnumber women 4822 to 2895. The freshman total enrollment is over 2700.

Eighty-nine students from abroad representing 38 countries, is an increase over last year's 63 students from 30 countries.

**OHIO UNIVERSITY'S** airport now has a 3200-ft. concrete airstrip. Grading started during the summer and the job was completed by the beginning of October. The football team was able to fly out of the Ohio U. Airport for the Youngstown game and will enplane for Louisville, Ky., for the Nov. 14 game.

Some of the countries represented are: Afghanistan, China, Denmark, Egypt, England, Formosa, France, Greece, Germany, Hong Kong (13), India, (9) Iran, Iraq, Korea, Nigeria, Norway, Thailand, Vietnam and the West Indies.

### **President Visits Columbia**

**DURING THE MONTH** of October, President John C. Baker made a survey trip for the International Cooperation Administration of the U.S. State Department.

The Colombian government in South America and university officials had asked President Baker to make recommendations for development of educational programs there. Dr. Baker visited the University of Andes in Bogota and the University of Valle in Cali.

Because of wide experience here and abroad in the field of education, Dr. Baker was chosen by the ICA to make the survey trip. Last fall President Baker made a similar trip to Camodia for the ICA.

### **Article by Fairfield**

**IN THE CURRENT** issue of the **MIDDLE EAST JOURNAL**, a publication of the Middle East Institute, Washington, D. C., there is an article by Dr. Roy P. Fairfield, assistant professor of government.

## ALASKA (con't. from page 8)

find a job soon. I guess I'd been better off if I'd stayed stateside."

That's part of Alaska's problem as a new state. Seasonal work, and even then not enough jobs to take care of all the migrants seeking their fortune.

It looks as though the airlines will be forced to accept only those with round trip tickets.

It is interesting to find people grasping for suitable substitute terminology for "outside" and "stateside." We are fortunate in Hawaii because we can still talk about "the mainland" and call newcomers "coast hoales," but in Alaska one has been "outside."

Also it seems they need a little revision of the terminology for the natives because it seems to carry a slight derogatory sense.

Fortunately in Hawaii that connotation was dropped many years ago so that there is a bit of heritage in being Hawaiian of which most Hawaiians are very proud. Maybe

that will come to Alaska too in the future as leadership is developed through education of the Eskimos.

Alaska is a state similar to the rocky part of Colorado only more rugged. It is chiefly mountainous with bald peaks except for their snowy caps which with their luminous light reflected from the sun makes midnight seem as though it were at the break of dawn.

At 30 I might have been willing to brave Alaska and its pioneer spirit but today I am willing to be a visitor and return with a sigh of gratefulness to my little beach home in Hawaii. There the wind of night is not so often like all blind earth sighing in her sleep.

I am willing to forego the endless sight of infinite snow flakes that bring the tall sky down to where one can place his hands on it. But I'll remember the moose as he comes plunging through the forest wall even though the hunters rifle waits beside the lake.

I loved my brief stay in Alaska, but I'm also glad to be home again.

# alumni scope

1909

JAMES WISDA and his wife spent part of the past summer touring Europe, taking in Ireland, England, Holland, Belgium, Austria, Switzerland, Italy and France.

1910

MABEL LEYDA COOVERT and her husband spent some time in California and Florida in the past year. They reside at 582 Greenwood Ave. in Akron.

1914

HAZEL STRODE BEVINGTON is a teacher in the Amanda Public School.

CHARLES E. SKINNER, who is visiting professor at Southern Illinois University, spent a year as visiting professor of psychology at Kent State University and lecturer in education at Western Reserve. He and his wife the former Mary Shuman, '14, live at 814 South University Ave., Carbondale, Ill.

1915

LOUIS FOLEY, chairman of the Department of English at the Babson Institute of Business Administration, Babson Park, Mass., returned to the school in September after a tour of France. He and his wife made the European trip after teaching part of the summer at a French-language camp for girls in Ecole Champlain, Ferrisburg, Vt. Mr. Foley has been associated with the summer camp for many years.

CHARLES T. PAUGH is assistant director in the BW systems engineering division of The Army Chemical Corps Engineering Command.

1916

MARIE DAVIS CREELMAN, after teaching for 43 years, has retired. She taught for 37 years at Walnut High School in Cincinnati, Ohio.

EMMA STOCKMAN, who taught for 45 years, is now retired and expects to travel through Europe and Hawaii. She taught in the Akron Public Schools for 39 years.

FRIEDA DINSMOOR HOLLINGSWORTH is teaching in the Akron Public Schools at Firestone Park.

JUDGE ROY J. GILLEN, who has served the public for more than 40 years, has retired. He was on the Fourth District Court of Appeals for 24 years. He and his family reside at 21 Pennsylvania Ave. in Wellston, Ohio.

1917

ALICE G. HARRIS has retired from teaching. She is living at 2820 Collingwood Ave., Toledo, Ohio.

1918

JOHN A. LOGAN, prominent investment banker and management counselor in Washington, D.C., and a member of the OU Alumni Board of Directors, was one of the well known men of Washington featured in a fashion section of the October issue of Gentlemen's Quarterly magazine.

1919

RUTH HARRIS BEEBE is teaching in the Milwaukee Public Primary Schools. She has taught for 10 years. She and her family live at 5611 W. Washington Blvd., Milwaukee, Wisconsin.

1921

AMADOR P. BARROS is an electrical engineer in Rio de Janeiro, Brazil.

HERBERT I. BALLENTINE has retired from teaching. Formerly he taught in Cleveland, Ohio.

1922

FRIEDA F. CHAPMAN, who has retired from the Education Dept., at Youngstown University, is now living in Sebring, Fla.

OLIVE CULF BAKER is the assistant to the supervisor of the Strongsville Post Office. She has held that position for the past 13 years. She and her family live at 19856 Royalton Road, Strongsville, Ohio.

1923

WILDA FELOCK DEWITT is a fifth grade teacher in Woodsfield, Ohio. She has taught for 10 years.

JEANNETTE OVERMAN COOK is X-ray and blood chemistry technician in Loudonville, Ohio. She has had that position for the past five years.

1924

ESTHER KENNY STAATS teaches speech and debate in the Athens City School System.

ANITA CLINE has retired after 40 years of teaching. She lives in Ashley, Ohio.

1925

RAVAUD CLARK CHAPMAN is vice president and director of the Fulton Ried & Company, Inc. He has been employed by that firm for 11 years. He and his family live at 131 Eastbrook Dr., Euclid, Ohio.

MILDRED WILEY EVANS and her husband spent the past summer in Alaska where they replaced the Missionary of the Chapel-by-the-Lake, in Auke Bay. They also took a freighter trip around South America.

LEWIS W. SANDS retired from the Chagrin Falls school system after 34 years of service. He was superintendent for 27 years.

1926

CORINNE MCINTOSH BABBERT and her husband, Harry, spent a month in 1958 touring Europe. They reside at 2314 Edington Rd., Columbus, Ohio.

1927

VERNA CARDWELL GLEASON has been teaching for 25 years. She resides in Vinton, Ohio.

1928

LEONE OTTAWAY CONRAD is an English teacher at Perry High School. She has also taught at Niagara Falls.

HELEN THOMAS DERRENBERGER is an elementary teacher in Loudonville, Ohio. She has taught for 13 years. She and her family reside at 333 Baker Court, Loudonville.

ANIGAIL BRADFORD DRAKE is a first grade teacher in the Portsmouth City Schools.

JOHN WILLIS has a Real Estate Office in Columbus, Ohio.

BESS LEMMOR, who has taught in Maryland for the past 28 years, is taking work in special education at the University of Syracuse, and Maryland University. She lives at 6117 43rd St., Hyattsville, Maryland.

1929

JOHN F. CALDWELL is a social sciences teacher at Waverly High School. He has taught for 18 years.

1930

LOUISE AUBERLE DULIN is teaching kindergarten in the Jamaica School in Aurora, Ohio.

**LOREN T. RIDGE** is the minister of the Community Methodist Church in Parker, Arizona.

**LEONARD M. SMALL** is the toy buyer for the Grand Way Stores. Mr. and Mrs. Small (Judith Schwartz, '49) reside at 1180 Ringwood Ave., Pompton Lakes, N.J.

1946

1947

1948

DR. JOHN CHARLES BUCUR is a neurosurgeon in the Arlington and Alexandria areas of Virginia. He and his family live at 3637 N. Nelson St., Arlington, Va.

1949

SAMUEL BELLIN is vice president in charge of operations for The National Key Company of Cleveland, Ohio. He and his wife Judith Feinsiller, '49 live at 3460 Belvoir Blvd., Beechwood, Ohio.

THOMAS C. PORTER is executive head of the Trimble Township Schools.

DAVID HOSTETLER had a show of sculptures in bronze and wood at Miami Museum of Modern Art, in the Dupont Plaza Center in Miami. He is an assistant professor of art at Ohio University.

HERBERT JOHNSTON is the author of a technical paper which was presented to the annual Corrugated Containers Conference. He is employed by the Battelle Memorial Institute in Columbus. He is married to the former Addie Collis, '50.

PAUL H. PRATT, of 2256 Eathedral Ave. N.W., Washington, D.C., is employed by the Machinery & Allied Products Institute.

RALPH N. DANISON is a purchasing agent in New Lexington, Ohio. He and his family reside on Woods Ave., New Lexington, Ohio.

KENNETH EARL FRENCH is a traveling auditor for General Electric. His wife the former Bonny Miller, '51 teaches in the Schenectady School system. They reside at 14 Mayfair Dr., Scotia, New York.

RICHARD OWEN is publisher of the Gallipolis Tribune and the Gallia Times which recently merged.

PAUL DORNBUSCH is systems design engineer for General Electric in Roanoke, Va. He and his wife Margaret Tober, '49 reside at 4114 Belford St., Roanoke.

RUSSELL F. COUTTS is salesman for the American Standard firm. He has been with the firm for the past 8 years. Mr. and Mrs. Coutts live at 246 Fair Ave. N.W., New Philadelphia, Ohio.

DONALD R. MIRACLE is a commercial teacher in River High School in Clarington, Ohio. They live near Clarington, Ohio.

THOMAS D. DAY is associated with The Ungar Brothers of Cincinnati, Ohio. He and his family reside at 3942 North Adams, Indianapolis, Ind.

WILLIAM E. DEAN is news editor of STEEL, the metalworking weekly.

HAROLD L. CARPENTER is a special agent for the Insurance Company of North America. He and his wife (Avis Esther Gill, '48) reside at 24241 Holt Ave., Los Altos, Calif.

1950

RUSSELL A. MILLIKEN, assistant professor of education at Ohio University, has returned to limited duty at his job, after suffering a heart attack on July 20. Dr. Milliken, who received his doctorate from Indiana University, has been at OU since 1958.

JESSE MILTON CAIN is principal of Ames-Bern school.

## Super Salesman

The business establishment at 2212 East Main Street in Columbus, opposite Capital University, is a progressive operation. The reason for the success of this used and new car business can be found in the dealer, LEX MAYERS, '49.

According to the Greater Columbus magazine, Lex sells more new Chevrolets than any other dealer in Columbus, and sells more cars than any other dealer of any make car in the mid-west area. It is also a fact that he is among the leading ten dealers in total cars sold in the world.

Since Lex started as a dealer two years ago, he has broken one sales and merchandising record after another. He has established a policy of bringing the satisfied customers back for a repeat sale.

Many factors are responsible for the success Lex has experienced in his business. An outstanding feature in this man is his enthusiasm which seems to transmit to those who come in contact with Lex. He also has the eagerness to try new merchandising ideas.

His primary medium is television and Lex does his own commercials on his Sunday evening show features. The program has top-rated movies and is one of the most popular film show on television.

Born in Cumberland, Maryland in 1926, Lex attended Howe Military School in Indiana before going into the service. He was on General McArthur's staff while he was in Japan during W. W. II.

JEANNINE HINES BYERS is teaching fourth grade in the Glouster schools.

ROBERT R. HILL is assistant chief engineer of the Lee Wilson Engineering Company, in Rocky River, Ohio. He lives in Bay Village, Ohio.

CLETUS HART is teaching general science in the high school at Vero Beach, Fla. He and his family live at 1431 Fifth Ave., Vero Beach, Fla.

WARREN G. PARMENTER is manager of the plastics section of the Walworth Co. in New York City. He and his family reside in Deans, N. J.

GEORGE V. DOUGLAS is an assistant professor of economics at Montana State College. He and his family reside at 412 S. Tracy, Bozeman, Montana.

WILLIAM E. ELLIOTT is a group engineer in the electronic development group of North American Aviation Company, Columbus, Ohio.

HENRY J. MYSLIWIEC is an engineer with the Reliance Electric & Engineering firm in Cleveland, Ohio.

E. G. (LEO) KOURY, who is associated with the Joseph Ujhelyi law office, is special counsel for the state's attorney general. He and his family reside at 3400 Meister Road, Lorain, Ohio.

MARY CATHERINE STARR, '59, to Thomas Deane Baker, July 18 in Wellston. They will live in Athens while he completes his senior year.

JOANN ELLEN SCHADY, '58, to DAVID LESLIE HILLARD, '59, July 18 in Olmsted Falls. Now living in Athens.

ANNE ZALUSKI, '53, to Robert Bishel, July 25 in Columbus. She is employed as a dietitian for Whitehall City Schools. They will reside at 3191 Dresden Street, Columbus.

Linda Lee Hempleman to JACK EDWARD LINTON, '59, August 7 in Millersport. He is employed as a chemist at the Mead Corporation.

MARY BEATRICE COURY, '52 to Robert B. Robinson on August 8 in Long Beach, California.

Charlotte Schrade to PAUL HARLAMERT, Jr., '57, on August 8. He is a Mechanical Equipment Design Engineer, with the NASA.

Gloria Sue Hartis to JAMES E. HUNTER, '58, on June 27 in Webster Springs, W. Va. He is in his second year of medical school at Western Reserve in Cleveland.

CAROL MAE BRADY, '59, to KARL RUNSER, Jr., '59 on July 17 in Barborton. They will live at 1146 Spring Ave. N.E. in Canton.

JANET KAY ORR, '58 to BOBBY LEE CHRISTIAN, '59, on July 4 in Frankfort, Ohio.

JESSIE ANN JANES, '59, to IVAN C. SMITH, Jr., '59, on August 2. Mr. Smith is entering Ohio State University medical school, and she is teaching home economics at Jefferson Local School in West Jefferson. They will reside at 1145 Northwest Blvd., Columbus, Ohio.

DONNA JEAN SMITH, '57 to Anthony A. Torres, August 1 at Churchtown, Ohio. They will reside at Marietta Route 2.

PHYLLIS JEAN BADER, '59, to SEYMOUR S. SACKLER, '59, on August 22 in Piqua, Ohio.

MARGARET DELOUGHERY, '55, to GEORGE E. MITCHELL, '55, on August 22 in Terre Haute, Ind.

JILL ELLEN EVANS, '59, to David J. Fattis, August 1 in Delmar, New York. Living in Chagrin Fall, Ohio.

BARBARA LOUISE SEIFERT, '59, to CHARLES H. BARNDT, '58, on August 15 in Cleveland.

CHRISTINE WELCH, '59, to Robert L. Wiswell, June 20. They live at 316 E. Lancaster Blvd., Lancaster, Calif.

MARTHA BOETTNER, '59, to DUDLEY M. ANDRES, '58, on August 1 in Alton. Now living in El Paso, Texas.

ELIZABETH EBERSBACH, '48, to Harold L. Stevenson, on August 8 in Columbus. She is a member of the teaching staff of the George C. Beery Junior High School in Columbus.

Mary Louise Phenegar to JAMES M. FELTIS, Jr., '56, on August 8 in Springfield, Ohio. He is enrolled in the College of Medicine at the University of Cincinnati.

PATRICIA ANN IRELAN, '59, to JOHN G. VAIR, '58, on August 1 in Waynesville. She is teaching in Rocky River and he is teaching in South Amhurst. They are living in Rocky River.

MARIE ELEANOR PEREN, '57, to Lt. Robert Hooper, on August 8 in Fairborn. She is employed as a teacher in Dayton.

LORETTA JAYNE SOVAK, '59, to James A. Madura, on August 8. She teaches in Shaker Heights. They live in Cleveland.

Marion Louise Seaton to LT. HIRAM J. CALLAHAN, '56, on June 23 in Berne, Switzerland. They will live in Senonches, France.

## Deaths

The man who taught the first journalism class at Ohio University the former head of the philosophy department and a former OU staff member died during the summer.

RAYMOND M. SLUTZ joined the OU faculty after receiving his master's here in 1912. As an instructor in English, he taught a journalism class in 1923 and the popularity of the course grew to such proportions that a department was established the next year under George Starr Lasher.

Slutz, a native of Colorado Springs, Colorado who did his undergraduate work at Ohio Wesleyan, resigned from the OU staff in 1938. He is the former superintendent of the Methodist Sunday School and was on the board of trustees of the First Methodist Church. He was also past president of the Lancaster Methodist Camp Grounds Board.

Ohio University professor emeritus DR. HORACE T. HOUF died July 7 after a long illness. Dr. Houf, who joined the OU faculty in 1928, after five years as Rio Grande College president, was head of the philosophy department for 18 years. Before retiring from teaching in 1955, Dr. Houf was chairman of the Academic Functions Committee and a member of the Sesquicentennial executive committee.

He has written many articles in the field of religion and wrote "Real Living" and "What Religion Is and Does." Dr. Houf's funeral was the first to be conducted in the Helen Mauck Galbreath Chapel.

THREE OHIO University graduates have been honored by the Royal McBee Corporation recently. L. to r., Ray Johnston, '50, William E. Burt, '36, and Homer Baird, '26, are all in sales. Johnston and Baird are members of the Top Ten in annual sales volume and Burt is president of Crest Club, the honor sales organization of the Data Processing Division of Royal McBee Corp. He is manager of the district sales office at Kansas City, Mo. Baird is in Athens and Johnston is in Newark, N. J.

EDWARD TAYLOR, who was a member of the OU sociology department for 19 years, died July 2. He had been teaching in Lynnfield College in Ontario since he left OU in 1950. He was preparing to leave for Europe when stricken.

DELMAR E. RUSSELL, '31, who had been in ill health for a year, died July 25. He was employed by the U.S. Corps of Engineers in the contract division since 1957. He also worked with the Atomic Energy Commission at Kentucky. He joined the corps of engineers after graduation from OU. He is survived by his wife, three sons and one daughter.

EARL THOMAS OSBORN, '23, former state representative and school administrator, died July 29 in the Newark Hospital after a short illness. He was engaged in the real estate business in Newark for 27 years. He was superintendent of Dresden Schools from 1910 to 1914. He was also superintendent of Muskingum County Schools and Hebron Schools. He was credited with the founding of the Summit Station High School prior to 1910 and when the school celebrated the 50th anniversary of the founding in 1958, he was a special guest of honor. Mr. Osborn was the Republican state representative from Licking County from 1922 to 1924. He is survived by his widow and one brother. Mr. and Mrs. Osborn celebrated their 50th wedding anniversary Dec. 26, 1958.

DOROTHY ROADARMOUR, '38, a native of Gallia County and teacher in the Gallipolis school system, died August 3 in Cincinnati. She attended Rio Grande College and received her degree from OU. In 1944 she went to Reading, outside of Cincinnati. She was a member of Grace Methodist Church, the French Colony Chapter Daughters of the American Revolution and the Conservation Club.

HARVEY B. LOEB, '56, was killed in an automobile accident during July. A graduate student at Syracuse University, Harvey was working at a radio station in Utica, N. Y. He was active in campus activities at OU, being a member of Blue Key, Omicron Delta Kappa, Phi Epsilon Pi, Footlighters, Phi Eta Sigma and station manager of WOUU. He is survived by his wife, Jan Davis, '56.

EDNA BRACE LOWMILLER, '42, a retired school teacher, was killed in an automobile

accident July 24, near Grove City, Pa. Miss Edna Lowmiller was active in OU Alumnae affairs and attended her class reunion in June. Miss Lowmiller was traveling with her sister, Mrs. Ralph Barnhill, who was critically injured in the collision.

Word has been received at the Alumni office of the death of LENORE F. VALLERY, '29. She was a teacher at Waverly high school following graduation from OU. She died April, 1954.

NINA MAE BROWNING, '13, a librarian at Arsenal Junior High in Pittsburgh, died July 18, 1955.

R. BLAINE COOPER, '20, a retired Columbus school teacher, died August 10 in White Cross Hospital. A resident of Morgan County since his retirement two years ago, Mr. Cooper was an instructor at Mound Junior High School for many years. He received his master's degree from OSU. Surviving are his widow, two daughters and four brothers.

WALTER MUIR, '27, died August 15 at his home in Lancaster of a heart attack, following a two-months illness of cancer. He was director of taxation for the Anchor Hocking Glass Co. for the past 15 years. He is survived by his wife, son, Walter who is a senior at OU, and a grandchild.

THEODORE D. KIENZT, '52, a captain in the Air Force, died August 22 when the TF-100 fighter trainer in which he was flying over the East China Sea experienced difficulty. Other pilots flying the same "round robin" formation saw Theodore successfully ejected from the fighter, parachute safely and land in the sea. He was stationed at Itazuke Air Force Base in Japan. He is survived by his parents, his wife and two young sons.

B. E. ECKARD, '93, died recently. He was retired and living in Ashland.

DOUGLAS G. GRAFFLIN, '31, died in August at the White Plains Hospital in New York. He had been headmaster of the Brooklyn Friends School and then principal of Central School District 4 in Chappaqua, N.Y. He is survived by his wife, four daughters and a son.

ARTHUR L. MCFARLAND, a native of Springfield and onetime head football coach at OU, died August 21 in a Martins Ferry Hospital after a long illness. He coached at Ohio U. for three years before turning to real estate and a bus line business. He leaves a widow and two children.

Word has been received in the Alumni Office of the deaths of ANNALOU HAYNES EVERETT, '49, WILLIAM B. HUNT, '50, and FRANCIS X. CLORAN, '58.

Joseph L. Hardy, husband of EDITH KEP-LAR HARDY, '35, died Sept. 1 in University Hospital.

JOSEPH LAMONICA, '47, died September 1 in St. Luke's Hospital in Cleveland from throat cancer. Joe had been a physical education teacher in Mansfield grade schools since 1951. He had other teaching positions in Bucyrus and Jacksonsville-Tribble. He has served as counselor at several camps during vacation periods, and recently was rifle instructor at Boys Camp in Pennsylvania. Survivors are his parents and a sister in Brooklyn and a brother in Pittsburgh.

FRANCES BALL, '20, retired teacher at the Arizona State School for the Blind, and a native of Wellston, died at St. Mary's Hospital in Tucson Sept. 6. From 1924 to 1930 she lived in Ann Arbor, Michigan, where she did secretarial work in the University of Michigan Hospital while doing graduate work.

The Alumni Office has received word that GAIL EVANS HOOD, '38, died Sept. 2. Her son, Peter, is a sophomore at Ohio U.

RALPH E. ORR, '29, former principal of the Nelsonville Junior High School died September 18 in Columbus. He had suffered a stroke several months ago and died in University Hospital where he had been a patient for five weeks. He taught school in Hocking County for several years and had served as dean of the YMCA College in Columbus. He taught school at Granville. He is survived by his wife, a son, three

brothers, two sisters and three grandchildren.

FLEDA DOOLITTLE MALONE, '38, died September 23 at St. Joseph Hospital in Parkersburg. For many years she was a teacher in Athens County and later in St. Cloud, Florida. She was the widow of the late Dr. J. A. Malone, who practiced medicine in Athens for many years. She is survived by two daughters.

CAPTAIN HOBART A. SAILOR, retired from the US Navy, died May 23. Funeral services were at Jacksonville Beach, Fla. and burial was in Arlington National Cemetery. Capt. Sailor attended Ohio University one year prior to his entrance in the Naval Academy in 1915. His sister, Gwendolyn S. Coburn, '23, lives in Bedford.

Raymond C. Sheppard, husband of DENA CAMPBELL SHEPPARD, '23, died July 13 at home in Belpre. Also surviving is a son, Alan J. Sheppard.

## A Permanent Role in Higher Education

### THE OHIO UNIVERSITY ALUMNI ASSOCIATION

WITH THE ADDITION of 16 new honor members during the past month, the total is now 452. Honor Membership can be acquired by payment of \$100 to the Ohio University Alumni Association, either in one lump sum or in payments arranged over four years. The plan offers a lifetime subscription to the Alumni Magazine as well as yearly reports from the university president, regular athletic news letters, and other benefits. If you have not already become an Honor Member you will want to consider this new plan.

The new Honor Members are

Donnalee Stout, '53  
 Doris Day, '32  
 Kay Shepard Eberle, '59  
 Charles R. Allberry, '42 and Eleanor McKenna Allberry,  
 Adele Albrink Osterhout, '49 and Francis W. Osterhout, '48  
 Nicholas L. Tecau, '34 and Lucretia Mihaltnan Tecau  
 Katherine Skowran Zellers and Dr. Paul T. Zellers, '48  
 George R. Jolly, '40 and Margaret Farragher Jolly  
 Dorothy Knuff Shorr and Dr. Henry L. Shorr, '42  
 Lamar G. Jacobs, '59  
 Dr. Oscar A. Turner, '32  
 A. Eugene Trace, '30 and Emma Morton Trace, '32  
 John O. McWilliams, '13  
 E. Perry Webb, '30 and Laurel Webb  
 Louis Andre Colatch, '58  
 A. L. Lloyd, '42 and Anne Weymueller Lloyd, '42

## HONOR MEMBERSHIP

I hereby establish an Honor Membership in the Ohio University Alumni Association in the name of

- A. ( ) My check for one-hundred dollars is enclosed.  
 B. ( ) My check for twenty-five dollars is enclosed.  
 Please bill me in following months for the balance.

 Contributions deductible for federal income tax purposes.

Japanese student, Ruiko Yoshida, who is attending Ohio University on a trustees scholarship, poses beside the Japanese Friendship Lantern with members of the board of trustees. Left to right are Dwight Rutherford, Joseph Hall, Gordon K. Bush, John W. Galbreath, Miss Yoshida, President John C. Baker, C. Don McVay, Paul Stocker and Edwin L. Kennedy.

## Lantern of Friendship

VISITORS entering the Ohio University Center are intrigued by a beautiful granite object resembling a small pagoda placed in an oriental setting.

Subject of their attention is a 300-pound granite friendship lantern presented to Ohio University by the Tokyo Alumni Chapter, as a symbol of lasting friendship between former students and their alma mater. Shipped to Athens with a great deal of difficulty, it has been placed just inside the door of the Center in the artificial setting of a Japanese garden.

The idea for presenting a friendship lantern to the University originated at a meeting of the Tokyo chapter when President John C. Baker visited Japan in 1958. The chapter was new, but enthusiastic, and members voted to purchase the lantern for shipment to the campus. Maj. Tom Morgan, a 1941 graduate stationed with the Air Force in Tokyo, was in charge of arranging shipment.

After a series of difficulties encountered

enroute, the lantern arrived at OU in September. It has been on display in the Center lobby since that time.

The lantern is in four pieces that fit together perfectly to reach a height of about two feet. In the center is a space for the burning of incense.

The friendship lantern is used as a garden decoration and in Japanese religious ceremonies, and it is regarded there as the highest tribute in symbolizing good will.

Both Japanese and Americans belong to the Tokyo Alumni Chapter, that has grown rapidly in the past year, holding regular meetings and carrying out a membership drive throughout the Tokyo area.

Members who contributed to purchase of the lantern are Michiko Sato, '54; Jinji Yonezawa, '29; Ichiro Seto, '53; Tom Morgan, '41; Bunya Tsujita; Tadaski Shimada; Yasuo Hashiguchi, '51; Kiyoshi Sasaki; Charles L. Orr, '55; and Robert W. West, '38.

POSTMASTER: Please send Form 3579 to the Ohio University Alumni Office, P. O. Box 285, Athens, Ohio. Postage guaranteed.

## Ohio University Chair

### *Beautiful and Practical*

Finished in dull black with rings of gold on legs and rungs, this comfortable new chair is of solid birch construction, with cherry arms in natural finish. On the back, as the photograph indicates, is the official Ohio University seal in gold.

### *For Office or Home*

The chair fits either a traditional or contemporary decor and is equally at home in living room, library, study, TV room, dining room or office. It can be ordered as an adult chair, as a child's rocking chair, or as a child's straight chair.

### OUR PRICES

Orders placed as soon as checks are received by Alumni Office. Within a week shipment will be made from Gardner, Massachusetts, express charges collect.

Adult Chair with Cherry Arms	\$27.00
(Plus state tax if you live in Ohio)	
Child's Rocking Chair	16.00
Child's Straight Chair	15.00
